## PROJECTS

### La Plata Baseball (07/2022 - 07/2022)

- Developed an informational website for the La Plata High School baseball team using React and Redux
- Compiled player data for statistical analysis
- Set up a state management system with redux to maintain states for the roster and player list
- Used React Router for navigation between pages
- Built function components for the navigation bar, carousel, etc.
- Built with: React, Redux, HTML5, CSS3, JavaScript

### Cinego (06/2022 - 06/2022)

- Developed a movie review application that allows users to create an account, login, search movie titles, and write reviews incorporating the OMDb API
- Used the Express ES6 Template Engine to render application data on the client side
- Implemented cookies to save session data and created a user registration feature
- Incorporated Sequelize ORM to work with relational databases, including seeders, migrations, and models
- Built with: HTML5, CSS3, JavaScript, Node.js, Express, Bootstrap, PostgreSQL, Sequelize ORM

### Sheltr (05/2022 - 05/2022)

- Sheltr is an online service that provides addresses, hours, and other important information for homeless shelters in Washington D.C, Los Angeles, and Baltimore
- Used the Google Maps API to render homeless shelters on an interactive map and fetched API data from shelter databases
- Implemented a dropdown menu to allow users to easily switch between cities and map displays
- Built with: HTML5, CSS3, JavaScript, Bootstrap

### Avengers Jeopardy (04/2022 - 04/2022)

- Simple Jeopardy game played in the terminal, allowing users to collect money as they answer questions on the board
- Imported the Playsound module to add sound to the game
- Built with: Python

## EDUCATION

### Full Stack Web Development Certificate

#### Digital Crafts

04/2022 - 07/2022

Atlanta, Georgia

### B.A. of Political Science

#### Randolph-Macon College

08/2015 - 06/2019

Ashland, Virginia

## SKILLS

HTML

CSS

JavaScript

Bootstrap

Node.js

Express

React

Redux

Python

RESTful API

Postgres

AWS

Sequelize ORM

GitHub

Git

AJAX

Material UI

## WORK EXPERIENCE
